

Judging Terminals

Judging terminals for diving and synchronized swimming. Compatible with System 5 or System 6 Timing Consoles.

JT

Make your diving and synchronized swimming events run more efficiently. Colorado Time Systems offers a useful addition to your System 5 or System 6 Diving and Synchronized Swimming packages. CTS Judging Terminals (JTs) allow the judges to enter their scores from the judging stations eliminating the need for runners when your judges are placed around the pool. They also eliminate the inconvenience and effort of manually entering scores with the System 5 or System 6 Timing Console.

The JTs are also easy to install. Simply place up to ten judging terminals at the judging stations, route the cables to the Judging Interface box and insert the cable connectors into the jacks in the box.

The console itself is a tactile, sealed keyboard with a 0.5" LCD display for easy use. The terminal is powered through the System 5's external power. The console itself is 11.45" (29.1cm) w x 5.75" (14.6cm) h x 1.5" (3.8cm) d.

Colorado Time Systems is the Official Scoring Display Systems Supplier to United States Diving and Synchronized Swimming.
